

Essential Tremor Study

The UF Laboratory for Rehabilitation Neuroscience is working to recruit people with Essential Tremors (ET) to complete a study aimed to find a concrete way to diagnose ET, Parkinson's Disease, and atypical Parkinsonism.

What will the visit day look like?

- An MRI
- Cognitive (i.e. repeating numbers in a sequence) and Motor Testing (i.e. a 6 minute walk)
- Blood Draw
- Since we are hoping to study change over time we would ask that everyone who comes in for the study at baseline returns for a follow up visit.

Are there any Benefits?

- Free MRI
- Meals reimbursed for the length of your visit to Gainesville
- Travel Expenses
- \$100 Stipend

Call today to see if you qualify, and the study staff will work to make your visit as enjoyable as possible.

Sincerely,

Amy Snyder
